

# Options & Accessories

**Fork Extensions**

**Boom**

**Load Platform**

**Pipe Cradles**

**Rear Transport  
Wheels**

**Smart-Latch™**

## Fork Extensions

Insert onto the standard or adjustable fork tines for an additional fork length of up to 25 in (64 cm). Made in USA.

# Load Platform

Fits easily over the standard or adjustable forks - no tools required to install or remove. Assists in loading and unloading heavy objects that are too small or too awkward to span across both fork tines. Made in USA.

For illustration only, material lift sold separately.

## Pipe Cradles

Perfect for HVAC and other construction applications - Cradles bolt to the outside of the standard or adjustable fork tines. Made in USA.

For illustration only, forks sold separately or included on material lift. Pipe cradles are a separately sold accessory

## Boom

Transforms your material lift into a vertical crane or hoist. Positions tooling fixtures, hoists circuit breakers, lift engines, etc. Made in USA.

For illustration only, material lift sold separately.

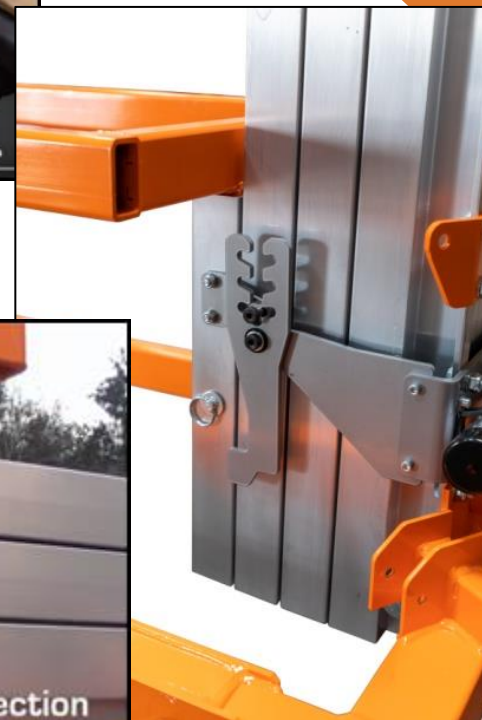

# Smart-Latch™ (Automatic Hold-Down System)

## Smart-Latch™ Automatic Hold-Down System

Protects machine against customer damage if they forget to engage the manual hold down bar prior to loading the machine for transport.

Simple gravity engagement and release.

Avoids down time, lost rental revenues, and lost service technician time (opportunity cost) by helping to prevent damage **before** it occurs.

# Rear Transport Wheels

## Rear Transport Wheel/Loading Option

This is standard equipment for all Construction Pro (MLC) and Mini-Pro (MLM) Series models but is optional for the MLI Industrial Pro Series.

This option allows the unit to be tipped back and maneuvered on two 10-inch wheels and allows the machine to be more easily loaded into some transport vehicles. This option is highly recommended for rental fleet machines.

**Note:** This option is **standard equipment** on all Construction Pro and Mini-Pro models.

● Industrial Pro models are equipped with two UHMW slide blocks to assist with loading into some transport vehicles.

● Industrial Pro models can be equipped with the **optional** Rear Transport Wheels to allow the machine to be more easily loaded in some transport vehicles and to also be provide for maneuvering the machine on the two 10-inch wheels around the job site.
